KONICA MINOLTA

Managing Information at Your Fingertips

Giving Shape to Ideas

Ease Up Your Work Efficiently with BizSmart

With today's ever-changing work environment, we are constantly on the go and might have limited access to important information, causing our productivity to slow.

With business conditions in constant change, companies from small businesses to big enterprises continuously explore for integrated document solutions best suited to their specific and diverse business needs. To help companies deal with their challenges, Konica Minolta is introducing the new **Konica Minolta BizSmart System** that integrates the functionalities of bizhub's series of high quality Multi-Function Printers (MFPs) with the flexible capabilities of Konica Minolta's Document Management Solutions and professional consultancy.

Konica Minolta BizSmart System helps companies optimise office and document workflows efficiently and manage information from capturing and archiving to output and distribution within your workflows, thus providing opportunities for business operations to perform more efficiently and transparently.

Furthermore, the new integrated **Konica Minolta BizSmart System** provides you with comprehensive & flexible document management solutions to help you manage information from different resources. With BizSmart you can manage your documentation and information easily, securely and remotely. We have solutions for all company sizes and we're able to deliver customised document management solutions to fit your specific needs.

So now you can enjoy all the benefits of improved document search & retrieval, information sharing, accessibility and data security, along with lightning-fast, quality colour or black-and-white printing & scanning, flexible paper handling, network & mobile connectivity with **Konica Minolta BizSmart System**.

Benefits

Information at your Fingertips

Improve the way you store, manage and share company information with an organised electronic filing system that is able to retrieve your information easily for better business decision making.

Work From Anywhere

With our web-based document management solutions, you can stay productive on the go with easy remote access that allows you to obtain all the information you need no matter where you are.

Reduce Office Storage Space

As businesses get bigger, storing and managing information in the office becomes a bigger challenge. Now you can free up precious office space by converting all physical files into electronic documentation so that you can maximise your office capacity.

Document Security

Be in control over who gets to access important folders & decide how users view, alter and contribute to sensitive files or documents to keep unauthorised personnel away.

Better Backup & Disaster Recovery

Run your business with a peace of mind by securely storing & backing up your data in a digital archive that protects your important information against unpredictable disasters like floods or fires.

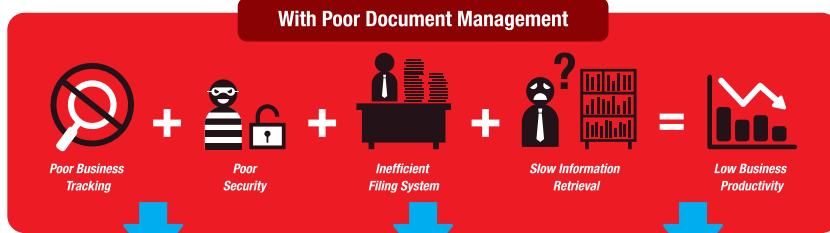

Document Profiling

Profiling allows users to quickly sort large volumes of data to find the right document. With an indexed archive, you can simply conduct a keyword search to pull up documents and information in seconds. You can also receive a preview to ensure you have the right file even before you open it.

Additional Benefits

- Seamless Integrated Interface with bizhub Series
- Workflow Management
- Cloud-based Storage Version Available

With Poor Document Management

Manage All of Your Concerns with BizSmart
