AccurioPress C84hc

THE POWER OF ACCURACY

EXPERIENCE VIBRANT AND TRUE-TO-LIFE PRINT IMAGES WITH THE ACCURIOPRESS C84HC

Recreating images accurately, just as you captured them, is not always possible with conventional CMYK inks and toners. The AccurioPress C84hc is uniquely engineered to solve this problem and bring your customers' work to life complete with its original vibrancy.

ENHANCED LIGHT BLUE AND GREEN

The combination of a wider colour gamut and higher Lightness value of the High Chroma cyan toner produces clear and bright colours. Colours such as bright blues and greens can be achieved much more effectively than with CMYK toner-based systems.

CMYK toner

High Chroma toner

VIBRANT PINK, PURPLE AND MAGENTA

The large colour difference between CMYK printing and RGB colours displayed on a monitor is one weakness of traditional CMYK print systems that can be avoided with a High Chroma AccurioPress C84hc.

Vivid colour with the AccurioPress C84hc makes it possible for graphic designers to achieve eye-catching materials, giving you a point of differentiation from other printers.

AT A GLANCE

AccurioPress C84hc

- Extended colour reproduction
- Expanded business applications
- Automatic registration monitoring
- Additional screening options
- Closed-loop density and image control

PRINT WHAT YOU IMAGINE THE WAY YOU IMAGINED IT

Unlock the full potential of AccurioPress C84hc– it's not just about colour; it's about the performance of accuracy and consistency. The AccurioPress C84hc combines cutting-edge printing technologies into one production-print machine, delivering outstanding quality at high speed. Consistently provide top-notch quality that aligns perfectly with your customers' expectations.

SUPERIOR QUALITY WITH 3,600DPI-EQUIVALENT × 2,400DPI HIGH-RESOLUTION OUTPUT

2,400dpi high-resolution output makes it possible to meet sophisticated printing needs. Improved image processing and an 8-beam LD (laser diode) enable the AccurioPress C84hc to maintain its speed even when printing in higher resolutions.

EXPANDED MEDIA COMPATIBILITY

Compatible with thick paper up to 360 gsm to realise a wider range of applications. Embossed paper printing quality has also been improved to expand the range of printed matter that can be produced. In addition, the standard fusing unit is compatible with envelope printing to enable additional printing on all-purpose envelopes at low cost.

Thanks to the increased capacity, you can now print banners up to 1,300mm in length, offering greater flexibility in banner design. Additionally, auto duplex printing for paper lengths of up to 864mm is now possible, enabling the production of special printed materials like A4 tri-fold prints and posters.

EFFICIENT WORK THROUGH SKILL-LESS OPERATION WITH INTELLIGENT QUALITY OPTIMISER IQ-501

All colour control and front-to-back registration adjustments, previously done manually, have now been automated with IQ-501. Optimal adjustments can be made quickly by anyone, even without specialised skills. This leads to a reduction in workload and waste, as it minimises the man-hours spent on quality control.

COMPREHENSIVE INTEGRATED IN-LINE FINISHING SOLUTIONS

Furnished with versatile optional finishers to handle diverse in-line needs, including a range of folding functions, saddle stitching, perfect binding, and an auto-trim unit. The in-line finishers produce ready-made print applications for boxing and shipping, fulfilling short turnaround times.

SPECIFICATIONS AND CONTROLLER

ACCURIOPRESS C84hc

SYSTEM SPECIFICATIONS

Resolution	3,600 equivalent x 2,400 dpi x 8 bit
Paper weight	62 – 360 g/m ²
Paper sizes	330.2 x 487.7 mm 330.2 x 862 mm (max. duplex) 330.2 x 1300 mm (max. simplex)
Paper input	Max.: 15,390 sheets ^{*1}
Dimension (WxDxH)	800 x 903 x 1076 mm
Unit weight	312 kg

***1: With optional paper feeder**

PRODUCTIVITY

A4 – max. per minute	81 ppm
A3 – max. per minute	45 ppm

– All specifications refer to A4-size paper of 80 g/m² quality.

– The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.

– The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5% coverage of A4). The actual life of each consumable will vary depending on use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.

– Some of the product illustrations contain optional accessories.

– All information stated in the brochure is correct at time of printing and subject to change without notice.

– All brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.
